- ✓ Hailed as the most complete and innovative eSIM solution
- ✓ Personalised service dedicated to telcos

eKYC subscriber onboarding for telcos

eKYC subscriber onboarding enables telcos to offer subscribers a fully digital onboarding and eSIM activation process to enhance the subscriber experience and increase customer satisfaction. Supporting the growing customer demand for digitalization and sustainability, digital onboarding solutions are expected to replace most legacy registration processes.

Secure, fast ID verification from your carrier app

Workz offers fast deployment with easy integration into a telco's existing customer care smart app through a software development kit. The solution also includes a back-end user management interface for telcos to oversee subscriber activity.

The solution ensures that telcos are KYC compliant and able to reduce fraud through the utilisation of biometric technology for instant identity verification.

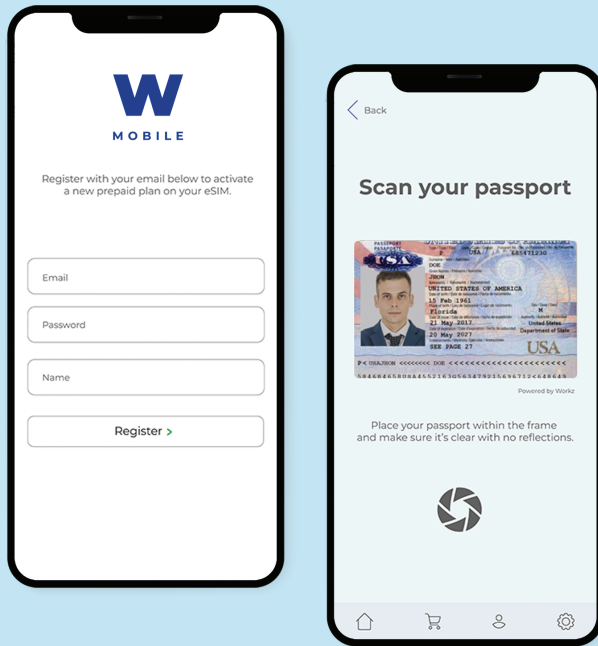

Key benefits for providers

- ✓ Full ID verification
- ✓ Enhanced subscriber experience
- ✓ Saves time and cost
- ✓ KYC-compliant
- ✓ Reduces fraud
- ✓ Easy integration into carrier app

Workz eKYC key capabilities

Workz eKYC provides a full digital onboarding solution to enhance the experience for the end user and network operator.

End-user features

- Reduce abandonment with completed registrations
- Convert real customers
- Increase customer conversions
